Sports Medicine

Dear Parents & Athletes,

Enfield High School would like to do an assessment of your child's balance, reaction time, and memory functions so that in the event you child sustains a suspected head injury in the future, we can compare the scores from the incident to the scores from their baseline assessment. This information is used in the evaluation and management of head injuries to help in the return to learn and return to play processes. There is no pass or fail on this baseline assessment and your child's scores are not compared to any other athlete's scores.

To perform the test, we are asking that your child be allowed to download a free app called "Sway Medical" to their phone or tablet. They will be given a temporary code on the day of testing to allow access to the apps' testing functions. At the conclusion of the baseline assessment, the app may be deleted. The icon below is a picture of what the app looks like (blue square with 4 white bars). Please ensure the app is downloaded on their device before the testing date.

Please feel free to contact us with any questions.

Thank you,

Mary Della Volpe
